

Navicat Premium is a robust, all-in-one solution for database development that enables seamless connections to multiple databases, including MySQL, PostgreSQL, MongoDB, MariaDB, SQL Server, Oracle, SQLite, Redis, and Snowflake, all from a single application.

Its native user interface delivers a streamlined experience, making database design, management, and maintenance easier than ever. Whether you're executing complex queries, performing data migrations, aligning data models with databases, or leveraging powerful business intelligence tools for insightful analysis, Navicat Premium provides the essential tools for optimal database performance and increased productivity.

Windows

FEATURE OVERVIEW

Data Editor

View, update, and delete records seamlessly in Grid View, Tree View and JSON View through our built-in editors. Integrate a data profiling tool for comprehensive and visual analysis of your data. You can also interact with the visual charts to further explore the data.

Object Designer

Create and manage any database object through a clean, tabbed interface. You can design a table in seconds just by describing what you need. It intelligently defines columns and data types, eliminating tedious manual setup and drastically speeding up your design process.

Query Edit and Debugger

Construct clean SQL rapidly. Build queries with intelligent Code Completion, snippets, and visual design tools while validating syntax in real time as you type. Refactor scripts safely to update aliases and symbols without breaking dependencies.

Troubleshoot complex procedural logic with breakpoints, step-by-step execution, and call stack analysis, while optimizing performance through interactive visual execution plans.

Ask AI

Customize and pin your favorite AI actions for instant access, ensuring you're always just a click away from optimizing your workflow. Leverage built-in actions to explain SQL, helping you understand complex logic and data flow, tune and optimize SQL for maximum performance, and format and beautify SQL for clean, readable code. Ask AI also provides instant suggestions to fix all sorts of errors, guiding you towards best practices and improving code quality with every correction.

AI Chat

Get instant answers by asking questions and enhancing your queries with database or schema context. The AI Assistant will deliver relevant and accurate information based on your structure, and you can even compare answers from different AI models. Compatible models include ChatGPT, Deepseek, Google Gemini, Ollama, xAI Grok, Anthropic Claude, and Alibaba Qwen.

*Navicat sends your inquiries to AI providers for processing, with responses delivered only to your local app. We don't store your info, and by using this, you consent to our data handling.

Model

Design and build complete database architectures from scratch in a visual workspace. Maintain logical entities and physical constraints together in a single hybrid model. Enforce project-wide naming conventions with standardized glossaries.

BI

Create visual representations of large data sets to unearth patterns, trends and relationships among data, and present your findings in dashboard for sharing. In a dashboard, all charts linked to the same data source are interconnected, allowing any actions performed on the charts to instantly update and reflect your selections.

Data Masking

Protect user privacy and meet strict compliance standards without losing data utility. Navicat 18 transforms sensitive production records into safe, realistic mock data so your testing, development, and QA teams can work effectively without risking data leaks.

Migration

Data Transfer, Data Synchronization and Structure Synchronization help you migrate your data easier and faster for less overhead. Deliver detailed, step-by-step guidelines for transferring data across various DBMS. Compare and synchronize data and structure between databases. Set up and deploy the comparisons in seconds, and get the detailed script to precisely outlines the changes you want to execute.

Data Dictionary

Create stunning document for each database element. You can choose from a range of pre-designed templates and personalize them to suit your preferences. Set up automated processes to export the document as PDFs, and share them with stakeholders via email.

Data Generator

Provide a comprehensive range of functions to generate a large volume of quality testing data. You can rapidly create realistic data sets with referential integrity based on business rules and constraints.

Import and Export

Import data into a database from various formats, or through an ODBC connection after setting up a data source connection. Seamlessly export data from tables, collections, views, or query results to popular formats such as Excel, Access, CSV and more.

Backup and Automation

Safeguard your data with our reliable local backup and restore solution, accompanied by a user-friendly GUI for MongoDB, Oracle Data Pump, and SQL Server Backup utility. Create and schedule batch jobs for your daily tasks, such as like running queries, importing and exporting data, transferring data, and get notification e-mails upon tasks completion.

Collaboration

Synchronize your connection settings, queries, aggregation pipelines, snippets, model workspaces, BI workspaces and virtual group information to the cloud service so you can get real-time access to them, and share them with your coworkers anytime and anywhere.

Secure Connection

Secure your connections with SSH Tunneling and SSL / TLS to guarantee the confidentiality, integrity, and availability of your data. Our advanced authentication methods, including PAM, LDAP, Kerberos, MFA, SSO, provide multiple layers of protection against unauthorized access.

Native Design

Navicat is natively designed specifically for a particular platform. We give you a more familiar and optimized experience that feels natural for the system you are running. Navicat delivers more stable and enjoyable experiences for your database management.

Cross-Platform Licensing

Cross-platform licensing is now available. Whether you're operating on Windows, macOS, or Linux, you can purchase once and select a platform to activate and later on transfer your license.

Trusted by Fortune 500 Companies for Database Development and Management

From global enterprises to individual developers, over 180,000 registered customers have chosen Navicat as their all-in-one solution to build and manage their databases.
